

Mobile Security Solutions

Protecting people, property & assets

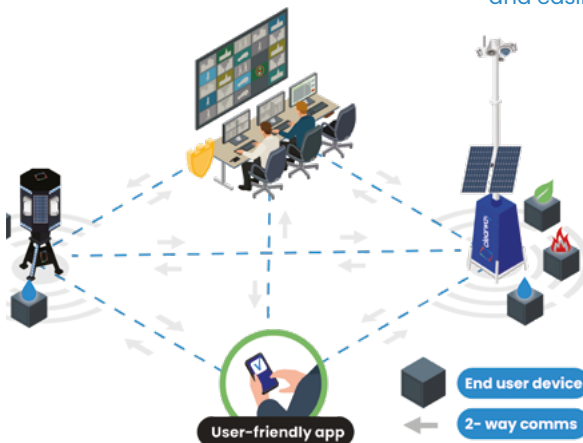

An autonomous intrusion detection system utilising battery and solar power that facilitates rapid deployment, combined with simplistic set up, to a wide variety of applications such as construction sites, vacant properties, land, plant and machinery, and areas requiring immediate security cover.

Designed specifically with ease of deployment in mind, this portable security solution offers full 360° coverage and can be armed and disarmed remotely via a user-friendly app or scheduling tool, or locally with optional fob or keypad. If activations occur, then all alerts are verified through the integral AI system and our NSI GOLD CAT II Alarm Receiving Centre (ARC) to ensure that any alarm activation protocols are instantly followed, whilst also providing all site specific information.

Key benefits

- ✓ Full 360° coverage
- ✓ Photo on demand and by scenarios
- ✓ Digital algorithm for filtering false alarms
- ✓ Integration with additional sensors such as smoke/heat/water detection & environmental sensors
- ✓ Lightweight, rapidly deployable with simple setup
- ✓ Android and IOS APP management
- ✓ Recycled and sustainable material

The system can be easily and rapidly deployed around an ever-expanding site and easily connected to and in conjunction with our inView CCTV Tower

Alarm monitoring & handling

The perfect standalone solution where remote CCTV security and monitoring are required. Easily transportable and set-up in minutes it can be positioned in the most inaccessible locations yet give 24/7 visual security with minimal maintenance.

This rapid deployment telescopic tower is designed to run on mains or solar/battery power, boasts near-360° coverage and provides a highly visible deterrent. With connection to multiple remote sensors placed around sites of almost any size, they will detect movement and instruct the mast-mounted camera's to rotate, zoom, focus and live-record the event.

Stunning images, together with incredible low-light performance, 3 x NDAA 2MP bullet cameras, leading-edge sensor technology, with a Super WDR low-light CMOS sensor for high-quality images in daytime or night-time settings. Timed arm & disarm and communication via the mobile network all come as standard. Fully weatherproof, the tower can be left unmanned for long periods and can be rapidly deployed and quickly set up on-site.

A range of features can be triggered through the Intelligent Analytics including automatic video recording, siren, email notification and ARC incident management.

The scope and flexibility of the Clearway inView CCTV Tower make this is an incredibly versatile and cost effective security solution.

Key benefits

- ✓ Solar powered
- ✓ 4G connectivity
- ✓ Quick to set up on-site
- ✓ Remote configuration
- ✓ 24/7/365 visual security
- ✓ Minimal maintenance
- ✓ Near-360° degree coverage
- ✓ PPE Monitoring & Compliance module
